SUMMARY

Electronics and Communication Engineering graduate with practical experience in software development and web technologies. Proficient in JavaScript, Python, and MERN stack development, with a strong interest in building efficient and scalable solutions. Open to entry-level roles in software development and Electronics and Communication Engineering domains.

WORK EXPERIENCE

MERN Stack Developer Intern

July 2025 – present

Luminar Technolab, Kochi, India

- Worked with MongoDB, Express.js, React.js, and Node.js to develop full-stack web applications.
- Built responsive and reusable UI components using React.js.
- Integrated RESTful APIs for frontend–backend communication.
- Used Git and GitHub for version control and followed agile development workflows.

Electronics & Instrumentation Intern

March 2023

Saverglass Ltd, Ras Al Khaimah, UAE

- Gained exposure to industrial electronics, sensors, and instrumentation systems.
- Observed maintenance workflows and real-time equipment monitoring processes.
- Learned about safety standards and automated production environments in an industrial setup.

PROJECTS

Smart Water Monitoring System

MERN Project

- MERN-based platform for monitoring water levels and water quality.
- Implemented CRUD operations, role-based access control, and responsive UI.
- Integrated REST APIs with version control using Git and GitHub. [🔗 Project Live](#)

Blood Donor Identifying System

React Project

- Interactive platform for browsing blood donors and submitting blood group details.
- Implemented Firebase Authentication and Firestore for secure login and data storage.
- Designed a responsive UI with sorting and filtering features. [🔗 Project Live](#)

E-Smart Intelligent Meter & Automated Reading System

Academic Project

- Developed a smart meter prototype for automated electricity usage recording.
- Integrated sensors, microcontroller, and communication modules.
- Improved accuracy and reduced manual meter reading errors.

Wireless Electric Vehicle Charging System

Mini Project

- Implemented wireless charging using inductive power transfer.
- Worked on coil alignment and power transfer efficiency optimization.
- Demonstrated a contactless EV charging concept.

EDUCATION

2021 – 2025	B.Tech in Electronics and Communication Engineering , TKM College of Engineering, Kerala <i>Affiliated to KTU University</i>	(CGPA:7.0/10)
2020 – 2021	Class 12 , Dayapuram Residential School, Calicut	(75%)
2018 – 2019	Class 10 , Indian Public High School, Ras Al Khaimah, UAE	(80%)

SKILLS

Programming	JavaScript, Python, C
Web Technologies	React.js, Node.js, Express.js, HTML, CSS
Databases	MongoDB, Firebase (Basic), SQL (Basic)
Tools	Git, GitHub, VS Code, Linux (Basic)
Electronics	Embedded Systems, Sensors, Arduino, Digital Electronics
Soft Skills	Teamwork, Problem Solving, Communication, Adaptability
Languages	English (Proficient), Malayalam (Native), Tamil (Conversational)

CERTIFICATIONS

- NPTEL – Internet of Things (IoT)
- AutoCAD Workshop – TechMaghi
- Fundamentals of Python – TKM College Collaboration
- MERN Stack Development – Luminar Technolab
